## DIRECT SUPPORT, GENERAL SUPPORT, AND DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

#### Section I. INTRODUCTION

#### 1. Scope

This manual lists repair parts, special tools, and equipment required for the performance of direct support, general support, and depot maintenance of the 4.2-Inch Mortar (Cannon M30 on Mount M24 or M24A1); and Mortar, Subcaliber, 60-MM, M31.

#### 2. General

This Repair Parts and Special Tools List is divided into the following sections:

- a. Repair Parts—Section II. A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level in figure and item number sequence.
- b. Special Tools, Test and Support Equipment—Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level.
- c. Federal Stock Number and Reference Number Index—Section IV. A list of Federal stock numbers in ascending numerical sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

#### 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in Sections II, III, and IV:

- a. Source, Maintenance, and Recoverability Codes (SMR), Column 1:
- (1) Source code, indicates the selection status and source for the listed item. Source codes used are:

Explanation

- Repair parts which are stocked in or supplied from the GSA/DSA, or Army Supply System, and authorized for use at indicated maintenance categories.
- M Repair parts which are not procured or stocked but are manufactured at indicated maintenance categories.
- A Assemblies which are not procured or stocked as such but are made up of two or more units, each of which carry individual FSN's and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories.
- X Parts and assemblies which are not procured or stocked; the mortality of which is normally below that of the applicable end item, and the failure of which should result in retirement of the end item from the supply system.
- X1 Repair parts which are not procured or stocked, the requirements for which will be supplied by use of next higher assembly or component.
- X2 Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.
- C Repair parts authorized for local procurement. When not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement.
- G Major assemblies that are procured with PEMA funds for initial issues only to be used as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DSU and GSU level or returned to Depot supply level.
- (2) Maintenance code, indicates the lowest category of maintenance authorized to in-

stall the listed item. The maintenance level codes are:

Code Explanation
C\_\_\_Operator maintenance

O\_\_\_Organizational maintenance F\_\_\_Direct support maintenance

H\_\_\_General support maintenance

D\_\_\_\_Depot maintenance

(3) Recoverability code, indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Repair parts and assemblies which are economically repairable at DSU and GSU activities and are normally furnished by supply on an exchange basis.

T.....High dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts are normally repaired or overhauled at depot maintenance activities.

U\_\_\_\_\_Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings, etc.

- S\_\_\_\_\_Repair parts and assemblies which are
  economically repairable at DSU and
  GSU activities and normally are furnished by supply on an exchange basis.
  However, when these items are determined to be uneconomically repairable
  by a GSU they will be evacuated to a
  depot for evaluation and analysis before
  final disposition.
- b. Federal Stock Number, Column 2. This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.
- c. Description, Column 3. This column indicates the Federal item name and any additional description of the item required. The abbreviation "w/e" when used as a part of the nomenclature, indicates the Federal stock number includes all armament, equipment, accessories, and repair parts issued with the item. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parentheses. Repair parts quantities included in the kits, sets, and assemblies are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

- d. Unit of Measure (U/M), Column 4. A two-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.
- e. Quantity Incorporated in Unit, Column 5. This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g. shims, spacers, etc.).
- f. 30-Day DS/GS Maintenance Allowances, Columns 6, and 7.

Note. Allowances in GS column are for GS maintenance only.

- (1) The allowance columns are divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the applicable allowance columns. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.
- (2) The quantitative allowances for DS/ GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.
- (3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipments can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51–100 allowance column. Example, authorized allowance for 51–100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.
- g. 1-Year Allowances Per 100 Equipments/ Contingency Planning Purposes, Column 8. This column indicates opposite the first apperance of each item the total quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year.

h. Depot Maintenance Allowance Per 100 Equipments, Column 9. This column indicates opposite the first appearance of each item, the total quantity authorized for depot maintenance of 100 equipments. Subsequent appearances of the same item will have the letters "REF" in the allowance column. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

- i. Illustration, Column 10. This column is divided as follows:
- (1) Figure Number, Column 10a. Indicates the figure number of the illustration in which the item is shown.
- (2) Item Number, Column 10b. Indicates the callout number used to reference the item in the illustration.

#### 4. Special Information

a. Identification of the usable on codes included in column 3 of this publication are:

Code Used on A....M24
B....M24A1

- b. Special tools and tool kits listed are authorized as required to units having direct or general support of the weapons.
- c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.
- d. The following publications pertain to the 4.2-Inch Mortar (Cannon M30 on Mount M24 or M24A1); and Mortar, Subcatiber, 60-MM; M31, and their components.

TM 9-1015-215-12 \_\_\_\_\_Operator and Organizational Maintenance
Manual: Mortar, 4.2Inch: (Cannon M30 on Mount M24 or
M24A1); and Mortar,
Subcaliber, 60-MM:
M31

TM 9-1015-215-20P \_\_\_\_\_Organizational Maintenance Repair Parts and Special Tool Lists for Mortar, 4,2-Inch: (Cannon M30 on Mount M24) and Mortar, 4.2-Inch: (Cannon M30 on Mount M24A1) TM 9-2009 \_\_\_\_\_Field and Depot Maintenance Manual; Mortar, 4.2-Inch: (Cannon M30 on Mount M24) and (Cannon M30 on Mount M24A1.)

#### 5. How to Locate Repair Parts

- a. When Federal stock number or reference number is unknown:
- (1) First. Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.
- (2) Second. Find the illustration covering the assembly group to which the repair part belongs.
- (3) Third. Identify the repair part on the illustration and note the illustration figure and item number of the repair part.
- (4) Fourth. Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.
- b. When Federal stock number or reference number is known:
- (1) First. Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alpha—numeric sequence, cross—referenced to the illustration figure number and item number.
- (2) Second. Using the Repair Part Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

#### 6. Abbreviations

| Abbreviations | Explanation           |
|---------------|-----------------------|

### 8. Recommendations for Maintenance Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to DA Publications) and forwarded directly to the Commanding General, Headquarters, U. S. Army Weapons Command, ATTN: AMSWE—SMM—P, Rock Island Arsenal, Rock Island, Illinois 61201.
